## Cardiff University Science in Health Public Lecture Series

September 2010 – May 2011

This series of free public lectures  
has two main aims:

- To open up areas of concern in health care.
- To present new research on health issues to the public.

## Programme of Lectures

### About the Lecture Series

The highly successful Science in Health Public Lecture Series commenced eight years ago. The lectures, organised by Cardiff University's School of Medicine, attract a diverse audience of interested individuals including the public, secondary school pupils and professionals.

Unless otherwise stated, the lectures will be held in the Large Chemistry Lecture Theatre, Main Building, Cardiff University, Park Place. There will be directional signage leading to the lecture theatre once inside the building. Disabled access is available and free parking is available in the car park to the rear of Main Building.

The lectures are held on Thursday evenings, running from September 2010 to May 2011. Refreshments will be available from 7.00pm in the Viriamu Jones Gallery located in foyer of Main Building. The talks commence at 7.30pm.

The lectures are FREE to attend and no booking is required. All are welcome – including secondary school pupils interested in a career in healthcare.

More information about the Science in Health Public Lecture Series can be found at [www.cardiff.ac.uk/events](http://www.cardiff.ac.uk/events)
